INTRODUCTION

The Elderly Care Management System is a mobile application designed to assist elderly individuals and their caregivers in managing daily activities, medications, health metrics, and emergency communications. Built with React Native (frontend) and Node.js (backend), the app features:

- Task and medication reminders with notifications.
- Health tracking with graphical visualizations.
- SOS emergency alerts for immediate assistance.
- A messaging system for seamless communication between elderly users and caregivers.

This manual provides step-by-step instructions to set up and run the application as user.

REQUIRED FILES

To run the application, ensure the following tools are installed on your system:

Prerequisites

1. Node.js (v16 or later)
 - Download: <https://nodejs.org/>
 - Required for backend (Node.js) and package management (npm).
2. Expo Go (Mobile App)
 - Install from the Google Play Store (Android).
 - Used to test the React Native application during development.

Dependencies

After installing the prerequisite, install the following dependencies:

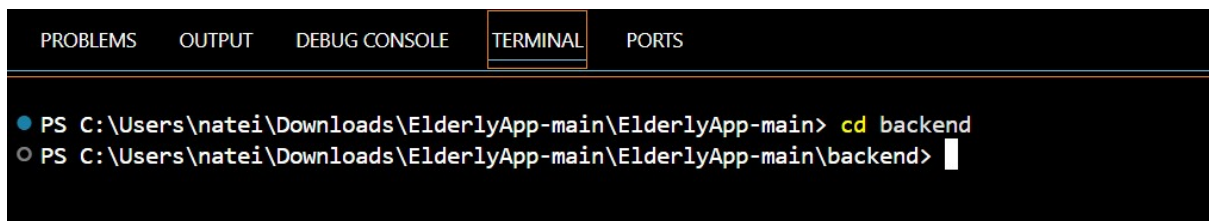

1. Navigate to Elderly App and run “npm install” .
2. Navigate to ElderlyApp folder and run “npm install -g expo-cli”

COMMANDS TO RUN

This section provides a detailed, step-by-step guide on executing the Python program within a Python environment. We will walk you through the necessary instructions and commands to successfully run the application.

Step 1: Navigate to the backend

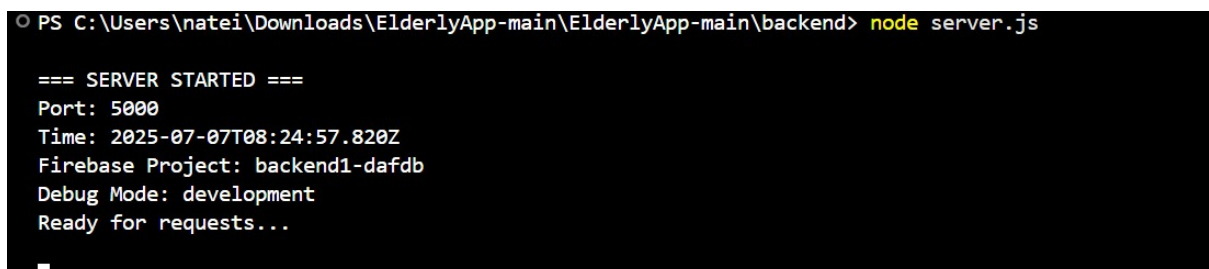

Navigate to backend folder by entering “cd backend”

```
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS
PS C:\Users\natei\Downloads\ElderlyApp-main\ElderlyApp-main> cd backend
PS C:\Users\natei\Downloads\ElderlyApp-main\ElderlyApp-main\backend> |
```

Step 2: Run command in backend

Enter “node server.js”

```
PS C:\Users\natei\Downloads\ElderlyApp-main\ElderlyApp-main\backend> node server.js

=== SERVER STARTED ===
Port: 5000
Time: 2025-07-07T08:24:57.820Z
Firebase Project: backend1-dafdb
Debug Mode: development
Ready for requests...
|
```

Step 3: Navigate to the frontend

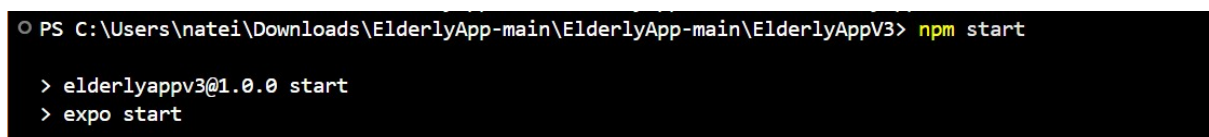

Navigate to frontend folder by running “cd ElderlyAppV3” in another terminal

```
PS C:\Users\natei\Downloads\ElderlyApp-main\ElderlyApp-main> cd ElderlyAppV3
```

Step 4: Launch app

Launch the expo app by “npm start”

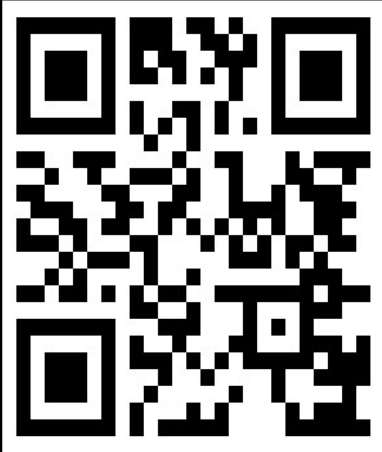

```
PS C:\Users\natei\Downloads\ElderlyApp-main\ElderlyApp-main\ElderlyAppV3> npm start

> elderlyappv3@1.0.0 start
> expo start
```

Step 5: Scan QR

Scan the QR Code

- > Metro waiting on <exp://192.168.1.11:8081>
- > Scan the QR code above with Expo Go (Android) or the Camera app (iOS)
- > Web is waiting on <http://localhost:8081>
- > Using Expo Go
- > Press s | switch to development build

CONCLUSION

This manual provides clear instructions to run the Elderly Care Management System, a JavaScript application designed to enhance elderly care through task management, health tracking, and emergency alerts. By following these steps, users can successfully launch the app for development or testing purposes.
